### Press Release

#### Gallatin County COVID-19 Update

As of Monday, June 29, 2020, at 12 p.m. Gallatin County has 12 new confirmed cases of COVID-19 since Sunday. Between Friday afternoon and Sunday morning, there were 18 new cases, for a cumulative total of 266. There are 43 confirmed active cases and one current hospitalization. There have been a total of 222 people recovered in Gallatin County. One person has died from COVID-19 complications.

The new cases are located across Gallatin County, and are a mix of contacts to known cases, community spread and travel related.

Please note that our local case numbers include tourists and out-of-state residents who are staying here and being monitored by the Health Department. The state is not counting those as our cases in their data. The state also updates its dashboard once daily at a different time than the Gallatin City-County Health Department's dashboard.

More data can be found on Gallatin City-County Health Department's dashboard on our website [here](#). This dashboard will be updated by 12 p.m. daily. Information on statewide cases continue to be found [here](#).

The Gallatin City-County Health Department calculates the **recovered case number** as the number of total cases minus any active cases, current hospitalizations and deaths.

Social distancing is not easy, especially this time of year as we are all eager to get outside and reconnect with the community. Your efforts to do the right thing do not go unnoticed. Individual choices, although they're not often the easy ones, make a big impact on community wellbeing.

Wearing face coverings, keeping your distance, and washing your hands are all small steps that we can take on our own to make a big collective impact.

The Gallatin City-County Health Department Call Center is open seven days a week from 8 a.m. to 5 p.m. to answer questions about COVID-19. Reach the Call Center by phone at 406-548-0123 or email at [callcenter@readygallatin.com](mailto:callcenter@readygallatin.com).

The most accurate local source of information remains the GCCHD [website](#).
