Press Release COVID-19 Deaths in Gallatin County

The Gallatin City-County Health Department is saddened to announce that two more Gallatin County residents have passed away from complications due to COVID-19.

One person was a female in her 60s who died in a hospital the week of October 24. The other was a female in her 80s who died in a hospital this week. The Gallatin City-County Health Department received the official death certificates today that attributed these deaths to COVID-19.

These latest deaths make for a total of 88 COVID-related deaths in Gallatin County. Statewide data reported by the Montana Department of Public Health and Human Services can be found [here](#).

In Gallatin County, 63% of eligible residents are fully vaccinated. From July 1 to October 30, 2021, Gallatin County saw 236 residents hospitalized who were positive for COVID-19. Of those, 189 individuals were unvaccinated or approximately 80%. From September 4 to October 29, 2021 statewide, [MT DPHHS reported](#) 411 deaths attributed to COVID-19. Of those deaths, 311 were unvaccinated or 76%.

The COVID-19 vaccines are safe and effective at reducing the risk of severe infection, hospitalization, and death. COVID-19 vaccines are available to anyone over the age of 12 from local pharmacies and clinics throughout the county. It is highly recommended that you make a plan to get fully vaccinated to help protect yourself and others.

The GCCHD website provides up-to-date times, dates, and locations where you can get your COVID-19 vaccine anywhere in Gallatin County. [Visit our website](#) and make a plan to get your vaccine today.
